

PROPOSED AIR QUALITY 2009 EQIP FUND CODE AND PRACTICES

Applications funded in this fund code will address air quality resource concerns in the following counties: Anderson, Blount, Cocke, Hamilton, Jefferson, Knox, Loudon, Roane, Sevier and Shelby. These counties have been designated by air quality standards as “non-attainment” for Particulate Matter (PM) 2.5, PM 10, and 8-hour Ozone. Applicants in these counties applying for primary eligible practices offered in the Air Quality Fund Code will not be eligible to compete for those same practices in any other fund code. However, applicants will be able to compete for different practices not available in this fund code in other fund codes. Supporting practices can only be used to support the primary eligible practices. If an EQIP plan of operations includes an animal waste storage or treatment facility, the participant must agree to develop and implement a CNMP. Local Work Groups will decide ranking priorities and develop a specific set of questions for each individual county. A hard copy of the local questions will be attached to this ranking sheet for all applications in this funding pool.

NOTE: *Before being ranked, all applicants must pass the Tennessee EQIP & WHIP Screening Tool.*
